General information about SAP Business Technology Platform

General Information

SAP Business Technology Platform (SAP BTP) is an enterprise platform-as-a-service (enterprise PaaS) that provides comprehensive application development services and capabilities, which lets you build, extend, and integrate business applications in the cloud.

SAP Business Technology Platform is SAP's innovative cloud development and deployment platform. It is supported by multiple cloud infrastructure providers and enables innovative technologies such as the Internet of Things, machine learning, artificial intelligence, and big data, thereby enabling you to achieve business agility and accelerate digital transformation across your business.

Scenarios

At its core, SAP Business Technology Platform enables you to do the following:

- Extend on-premise and cloud solutions
- Personalize and extend your existing applications, regardless of whether they run on-premise or in the cloud, to achieve agility and go to market faster.
- Integrate on-premise and cloud solutions
- Bring together disparate systems and IT landscapes to streamline your business processes and increase efficiency.
- Develop new cloud applications
- Create new cloud applications with a small capital investment in software and hardware.

For more Info see [SAP Help Portal](#) & [SAP Discovery Center](#)

Schaeffler BTP framework – general info

Started BTP setup in 2018 with dedicated subteam/persons

Increasing hybrid landscapes as well as increasing Cloud usage requires coordination and governance.

Different applications in different clouds are in use and several requirements regarding **IDM**, security, connectivity, etc. requires thorough knowledge.

Responsibilities

SAP Managed Platform is first contact for technical setup, new implementations and guidelines

Contact for technical questions regarding implemented services

Responsible for technical onprem connection setup and tools (e.g. Cloud Connector)

Responsible for regular **CPEA** contract check and alignment

Guidelines (extract)

BTP cockpit admin access to defined SMP team members only

Restricted access for Authorization team

New services must use same onboarding process as onpremise tools & systems (Demand Management, Security Process etc)

Schaeffler Incident & Problem management in use

Collaboration

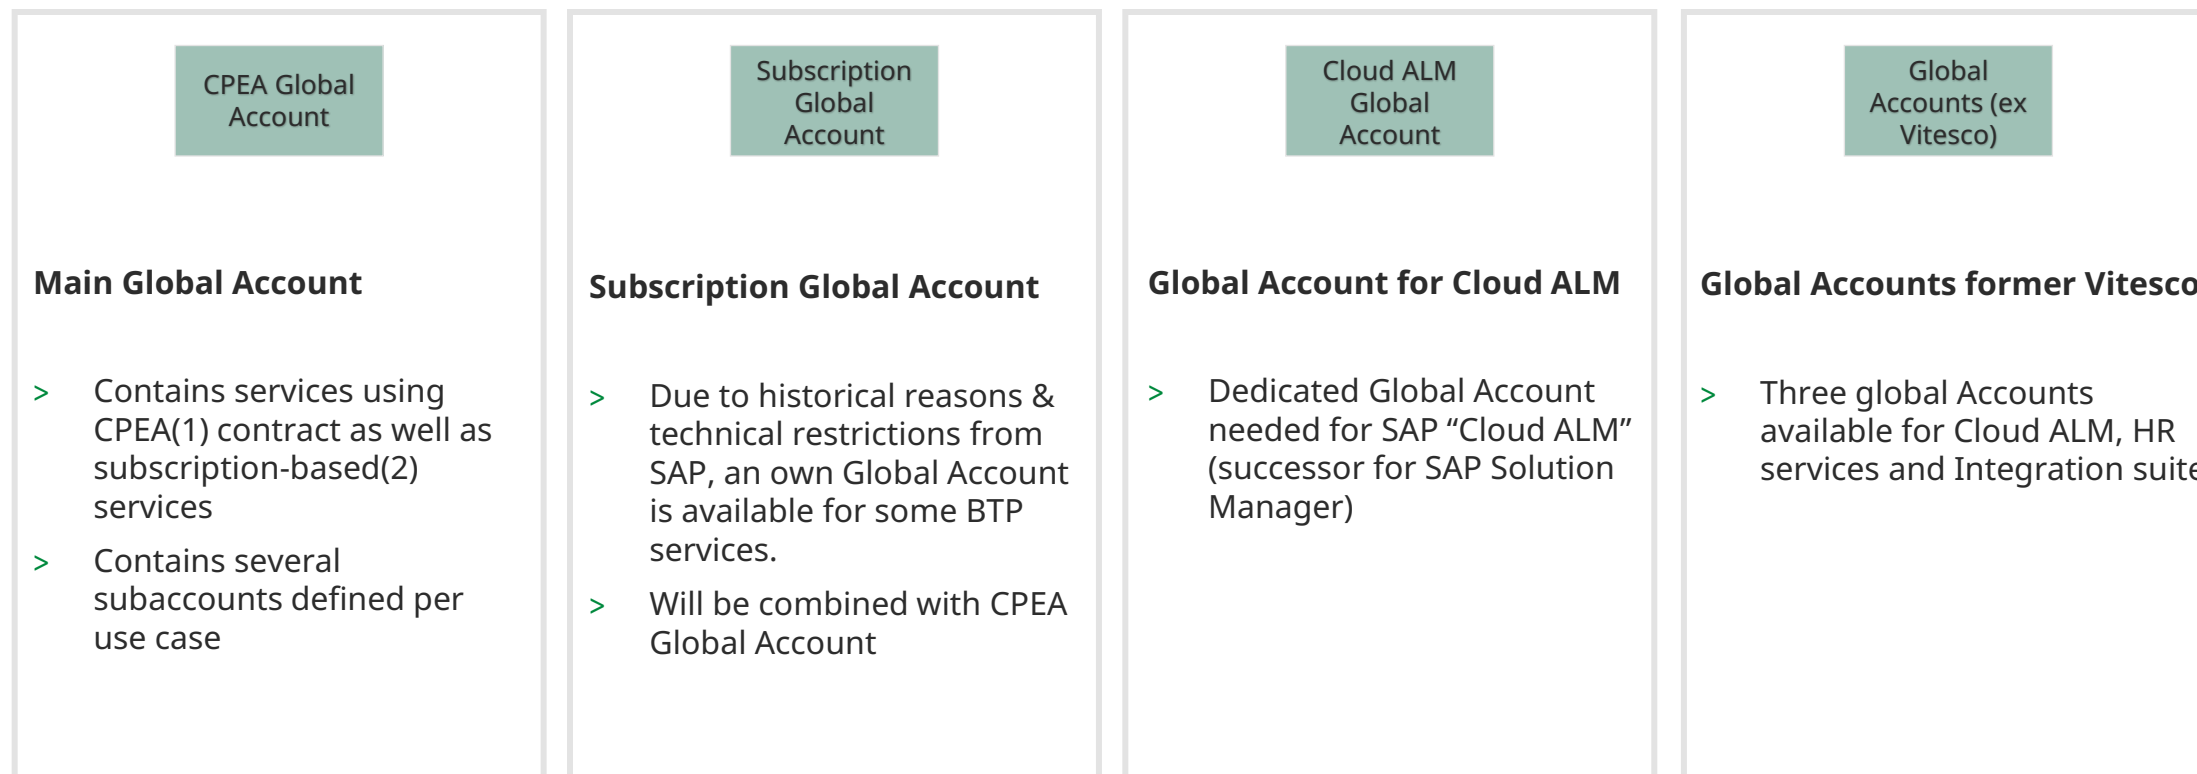

Close collaboration with S/4 teams for analyzing new technologies & innovative tools

Close collaboration with S/4 and R/3 teams for implementing BTP services and within daily business of implemented services.

These teams are application owner in most cases.

Regular exchange with SAP consultants about dedicated questions or new requirements

Schaeffler BTP framework – Global & Subaccount structure I

1) CPEA = Cloud Platform Enterprise Agreement, 2) own contract per BTP service

Schaeffler BTP framework – Global & Subaccount structure II

Name	Type	Environment	Provider	Region
▼ CPEA Schaeffler Technologies	Global Account			
> Advanced Event Mesh	Directory			
> API Management	Directory			
> Central Functions	Directory			
> Core IT Services	Directory			
> HR Functions	Directory			
> POC & Sandbox	Directory			
> Side by Side Central	Directory			

Subaccounts structured with Directories according to use case

▼ Side by Side Central	Directory			
CF Side by Side Central DEV	Subaccount	Multi-Environment	Amazon Web Services (AWS)	Europe (Frankfurt)
CF Side by Side Central MNT	Subaccount	Multi-Environment	Amazon Web Services (AWS)	Europe (Frankfurt)
CF Side by Side Central PRD	S			Europe (Frankfurt)
CF Side by Side Central PrePRD	S			Europe (Frankfurt)
CF Side by Side Central QAS	S			Europe (Frankfurt)
CF Side by Side Central QAS DL	S			Europe (Frankfurt)
CF Side by Side Central SBX	Subaccount	Multi-Environment	Amazon Web Services (AWS)	Europe (Frankfurt)
CF Side by Side Central TST	Subaccount	Multi-Environment	Amazon Web Services (AWS)	Europe (Frankfurt)
CF Side by Side Central TST int	Subaccount	Multi-Environment	Amazon Web Services (AWS)	Europe (Frankfurt)

Subaccounts available according to Schaeffler requirements, e.g. side by side approach for S/4 related services

i Rule for subaccounts: as little as possible as many as needed

BTP services in used at Schaeffler I

Services currently implemented at Schaeffler:

- Document & reporting services
- Localization Hub / Digital Tax Solution
- Returnable Packaging Manager
- Translation Hub

Non core BTP Services, but partly running / connected with BTP core:

- Integrated Business Planning (IBP)
- SAP Analytics Cloud (SAC)
- Success Factors (SSF)

If you want to get more information about each tool or service have a look at [SAP Discovery Center](#) or [contact us](#) to get latest info and contact persons at Schaeffler.

BTP services in used at Schaeffler II

Services within implementation status or available as POC

- SAP AI Launchpad
- SAP Document AI
- SAP Joule
- SAP Joule for consultants
- Automation Service
- Alert Notification Service
- Cloud Transport Management
- Datasphere
- Work Zone

Technical / administrative services

- BTP cockpit
- Cloud Identity services

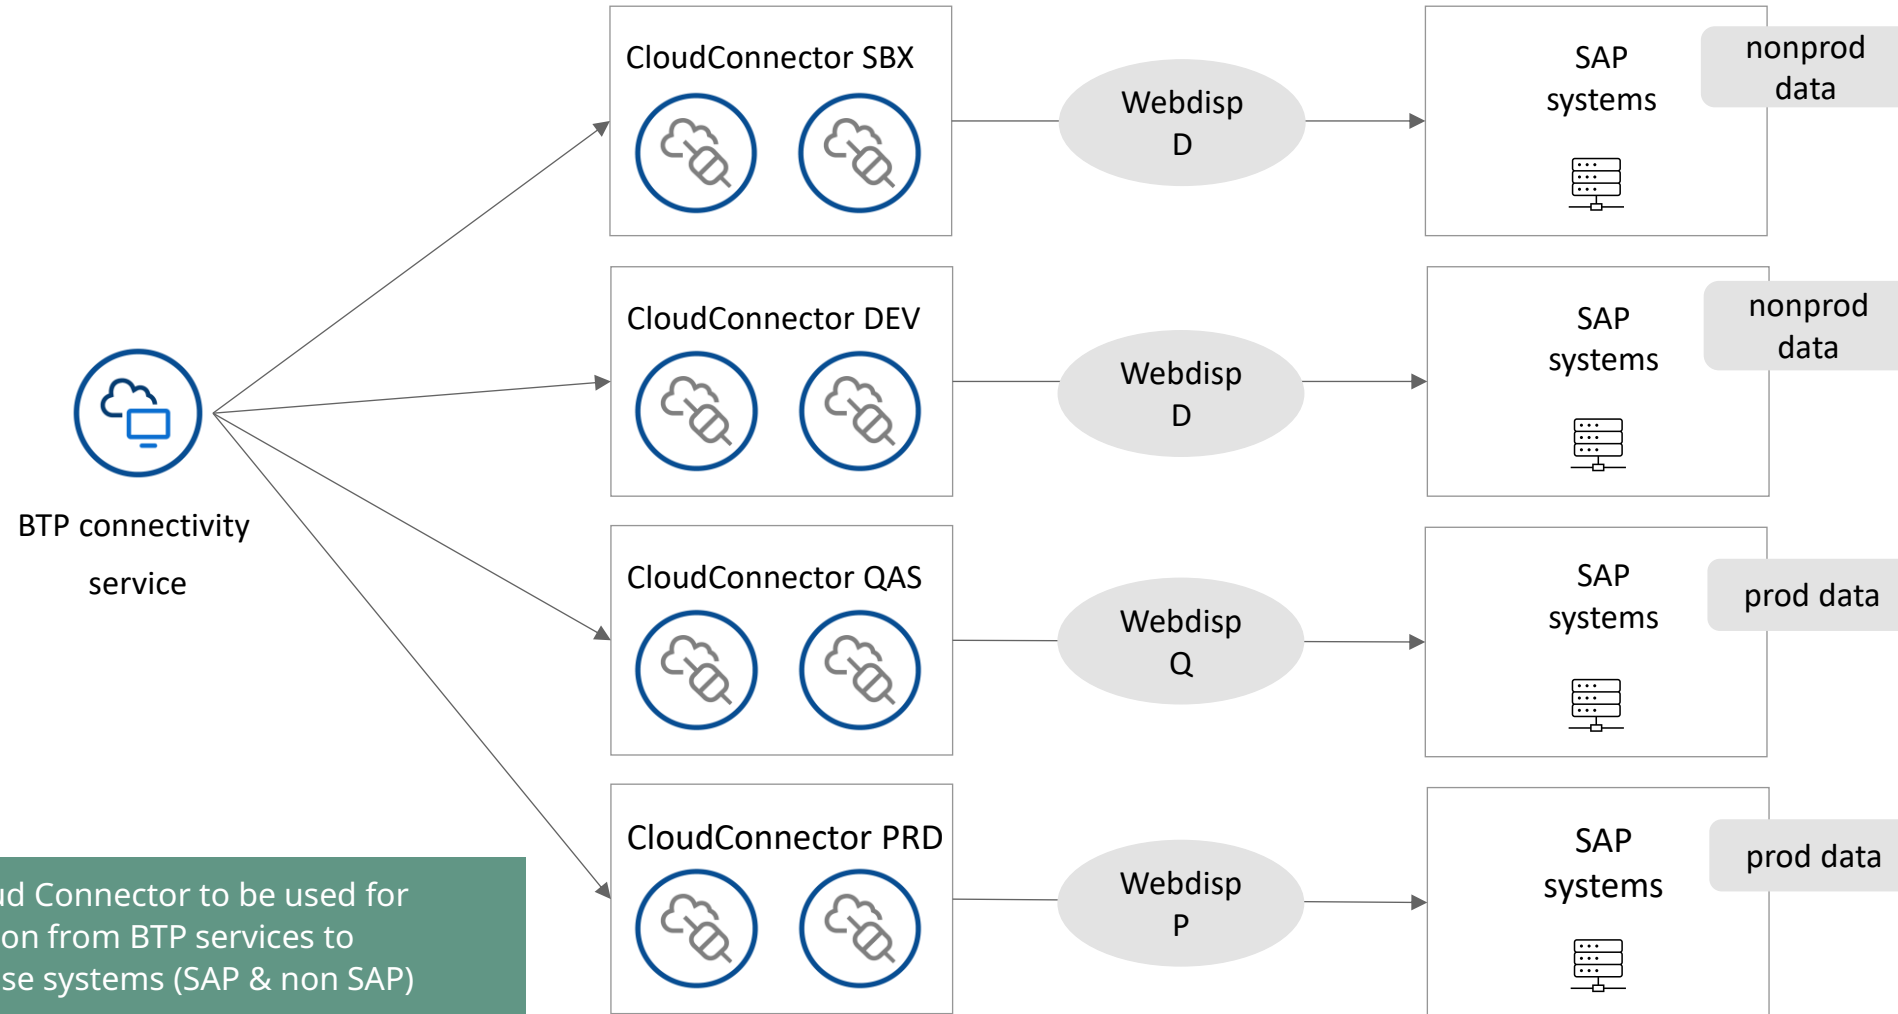

SAP BTP connection tools in use

- Cloud Connector
- Cloud Integration for Data services Agent
- SAC Agent (Tomcat, JCO)
- Smart Data Integration

If you want to get more information about each tool or service have a look at [SAP Discovery Center](#) or [contact us](#) to get latest info and contact persons at Schaeffler.

BTP services / technical connection overview

Webdisp = SAP Webdispatcher connection, contains also Loadbalancer setup

SAP Business Technology Platform – FAQ I

? Where do I find more detailed information about SAP Business Technology Platform

- Find out more details please visit the following SAP page: [SAP Business Technology Platform](#) & [SAP Business Technology Platform Details](#)

? How to find a solution offering? Which solutions & services are available within BTP?

- All services can be discovered in [SAP Discovery Center](#)

? Which SAP Business Technology Platform solutions are already implemented at Schaeffler?

- All currently implemented services can be found in [slide](#) before

? How can I contact to get more information about BTP @ Schaeffler?

- Please visit our [My Schaeffler page](#) or contact us via [email](#)

? Do I have to purchase a license to get access?

- This depends on required SAP Business Technology Platform solution. [Please get in contact with us](#)

SAP Business Technology Platform – FAQ II

- ? I am already using a SAP Business Technology Platform service and want to know which updates have been applied by SAP
 - All updates for every SAP Cloud Platform component are provided in [“What’s new information”](#)

- ? How can I get maintenance or downtime information?
 - [Cloud System Notification Subscriptions \(CSNS\)](#) can be used to receive direct information from SAP (S-User needed)

- ? How can I get service status and availability reporting information?
 - [SAP for me Cloud reporting](#) can be used to receive direct information from SAP (S-User needed)
