SAP Business Technology Platform – Onboarding overview

SAP Business Technology Platform - Onboarding

For a correct implementation of new BTP services, solutions or applications an onboarding process must be adhered to

1. S/4 and Coex scenarios must be aligned and approved beforehand with responsible S/4 teams
2. SAP Managed Platform Team (SMP) must be informed about new BTP service to be used. Request will be filled out together to gain all needed information and to align on possible implementation timeline.
3. Need of additional licenses must be checked by requestor together with SAP Managed Platform & IT license management
4. Schaeffler standard purchasing process / SAP Order form must be filled out together with IT license management team if necessary (not needed for SAP BTP services). Technical contact is Gebauer, Michael, Project contact can be defined by requestor
5. Onboarding information will be sent from SAP to technical contact (not necessary in case of most BTP services)
6. Technical onboarding steps (e.g. initial user setup, subaccount & security settings) will be done by SMP team
7. Overhanding to project team and user access for defined IT contacts needed for application onboarding
8. Support after technical onboarding provided by SMP team (e.g. Cloud Connector connections to onpremise systems)
9. IAM & security teams will overtake role handling in BTP and Entra to ensure that needed users will have access
