## CIS (Cloud Identity Services) general information

### SAP IAS vs SAP CIS

SAP has renamed SAP Identity Authentication Service (IAS) to SAP Identity Services (CIS) in 2024. Scope and functions are same, product will be developed and used from now on with name CIS.

CIS-IP (Identity Provisioning) is part of CIS, offering provisioning service to read/transfer user&role data from/to connected systems.

### Azure ID vs Entra ID

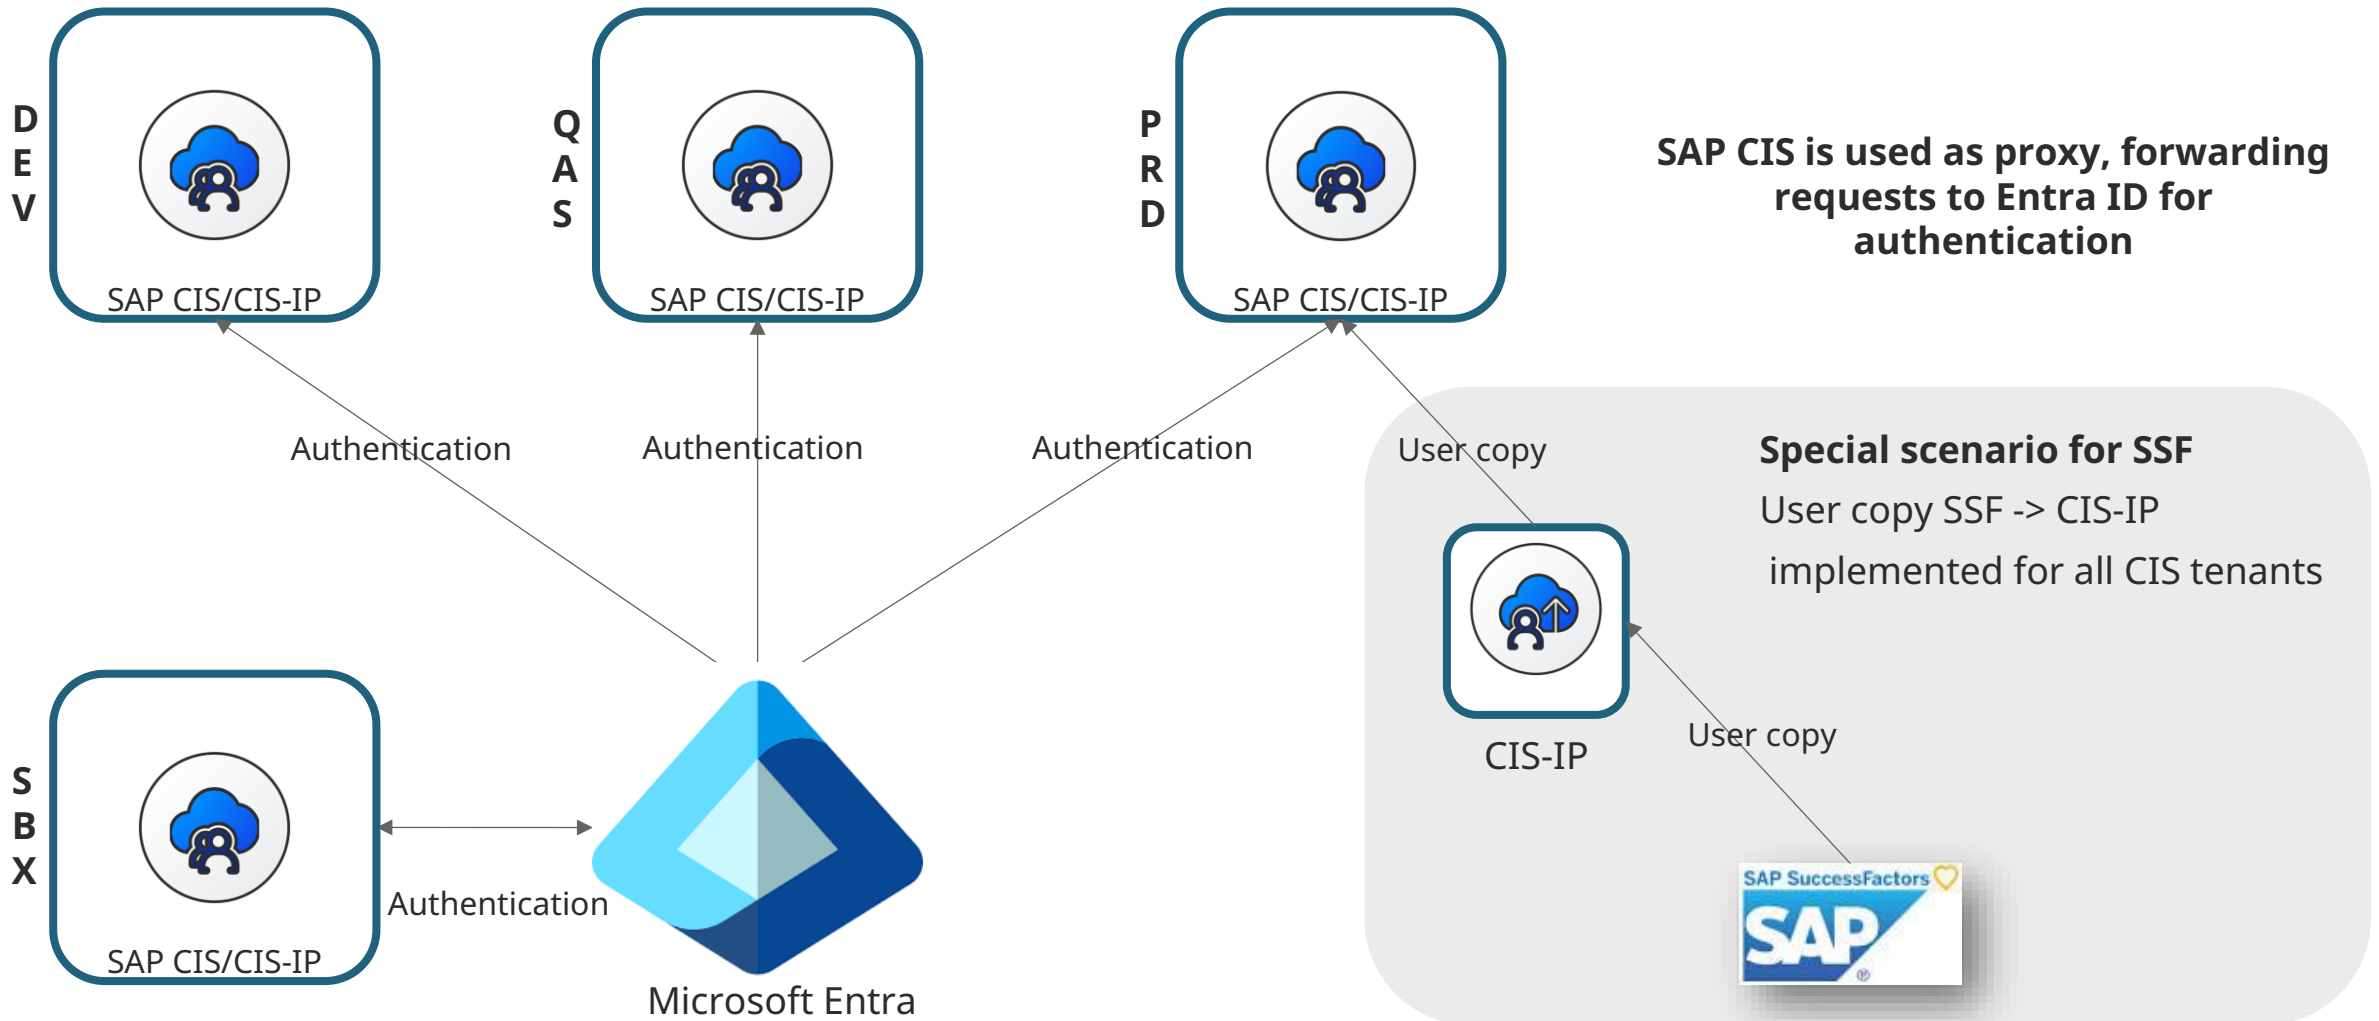

Microsoft has renamed “Azure” to “Entra”, product will be developed and used from now on with name Entra.

### CI general information

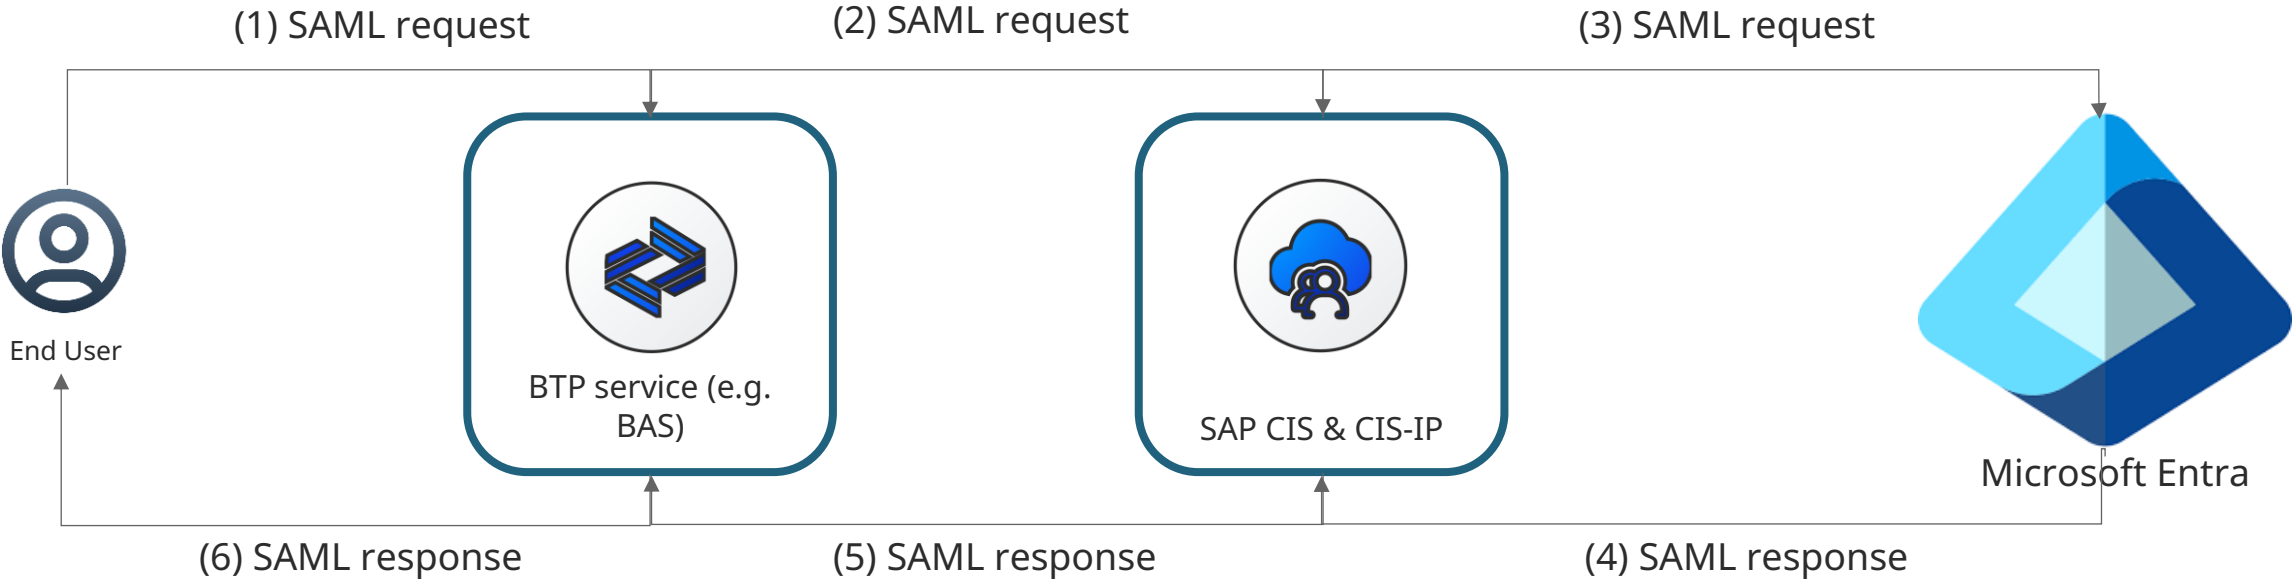

SAP Cloud Identity Services are SAP’s central cloud IAM services for authentication, single sign-on, and identity lifecycle. SAP solutions integrate with SAP Cloud Identity Services and reuse its functionality where possible. [More info](#)

It contains options for identity authentication and identity provisioning (CIS-IP) and does offer an identity directory.

## CIS (Cloud Identity Services) architecture

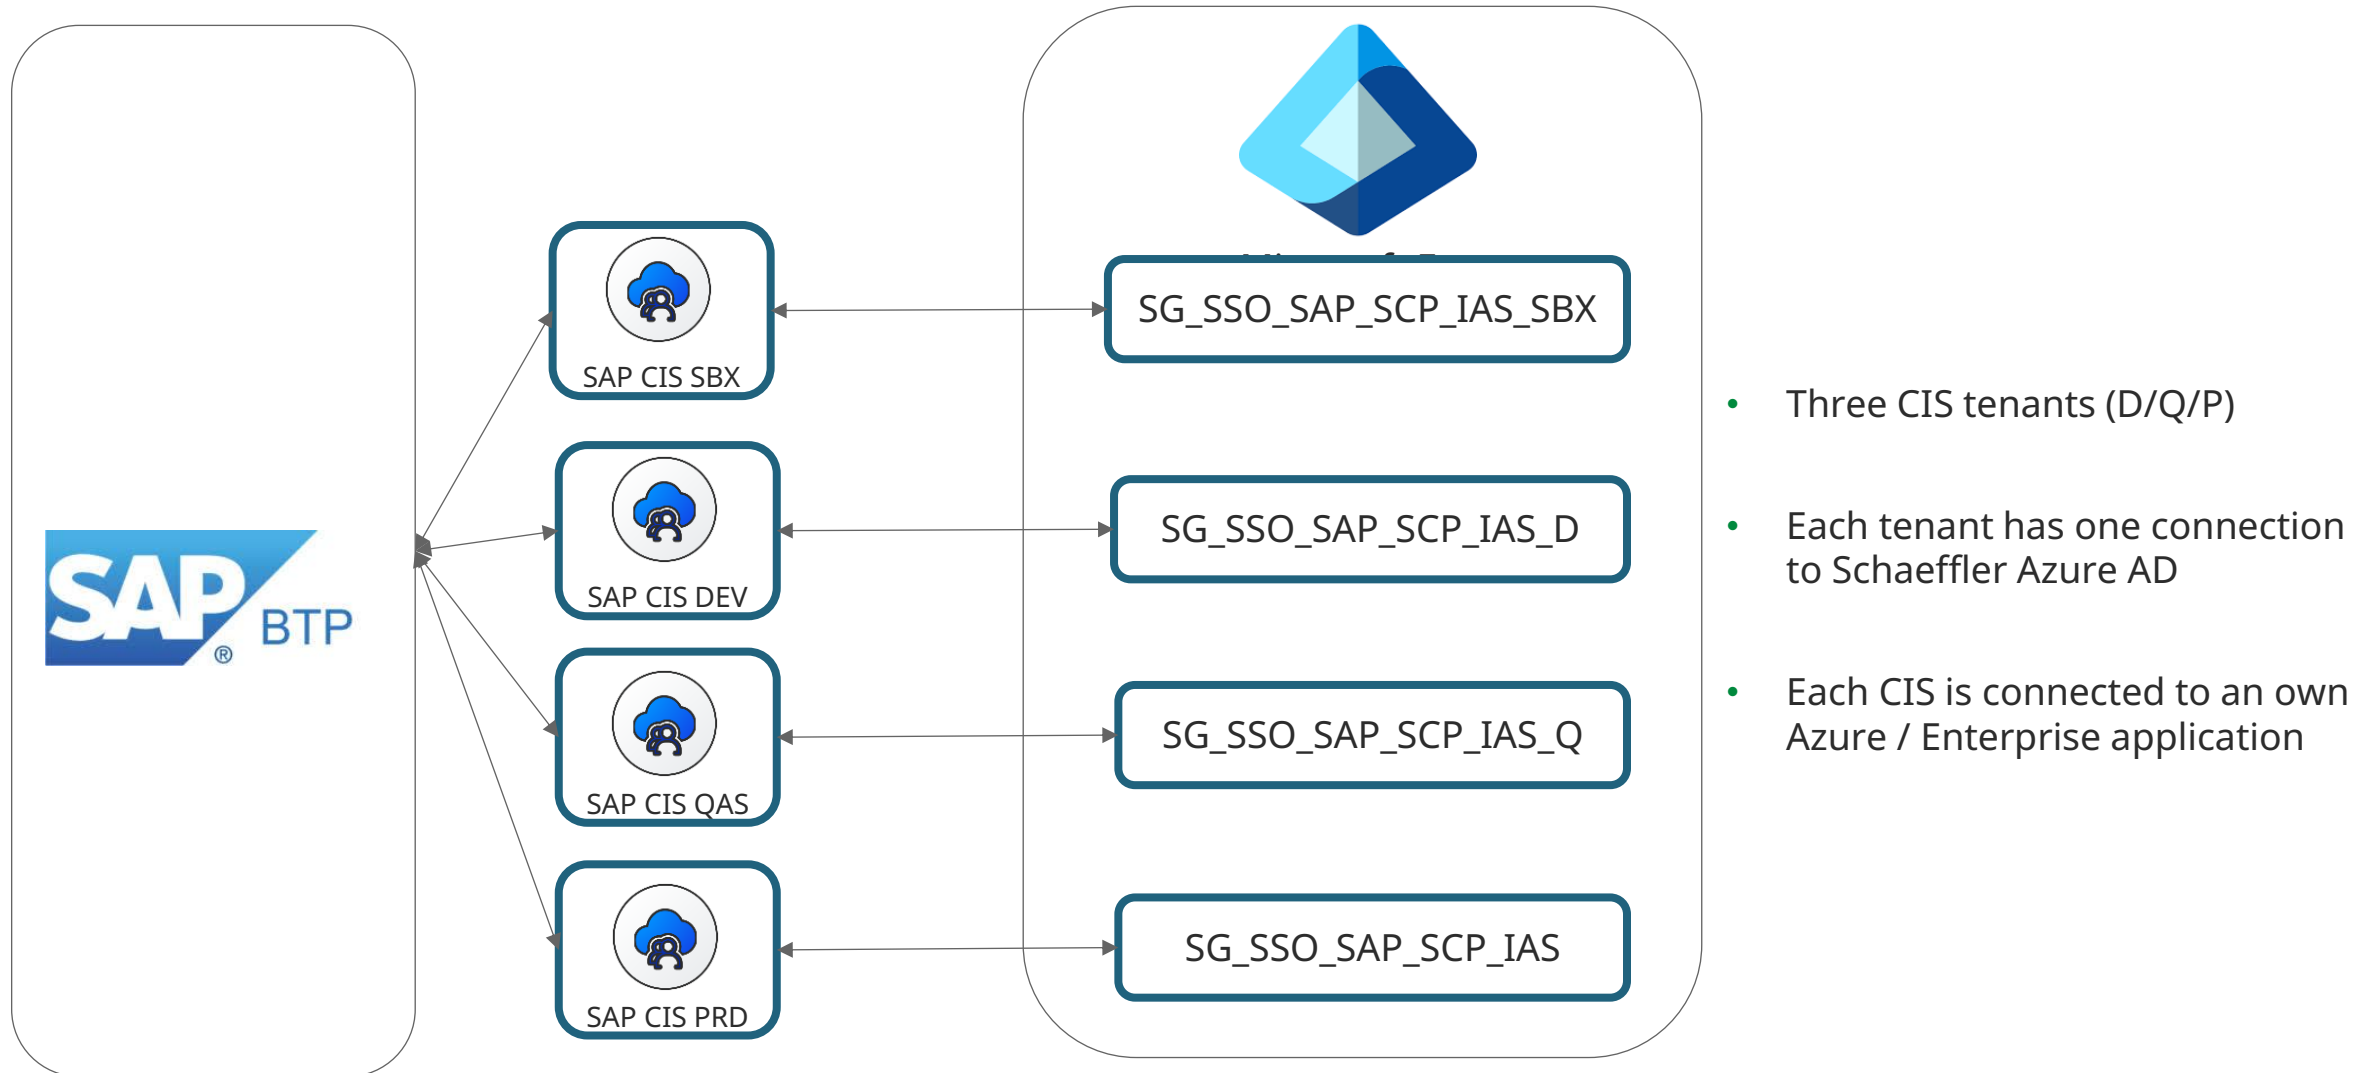

CIS / Entra authentication

- Each CIS tenant contains x subaccounts
- Each subaccount can have x services (BAS, API, CPI etc.)
- Each service will have x own role collections mapped to Azure AD roles -> Each subaccount can have x AD role mappings

## CIS-IP usage

**For dedicated services, Cloud Identity provisioning is in use**

- (1) Success Factors (usertransfer SSF -> CIS)
- (2) Integrated Business Planning (user & role transfer Entra -> IBP)
