SAP Discovery Center

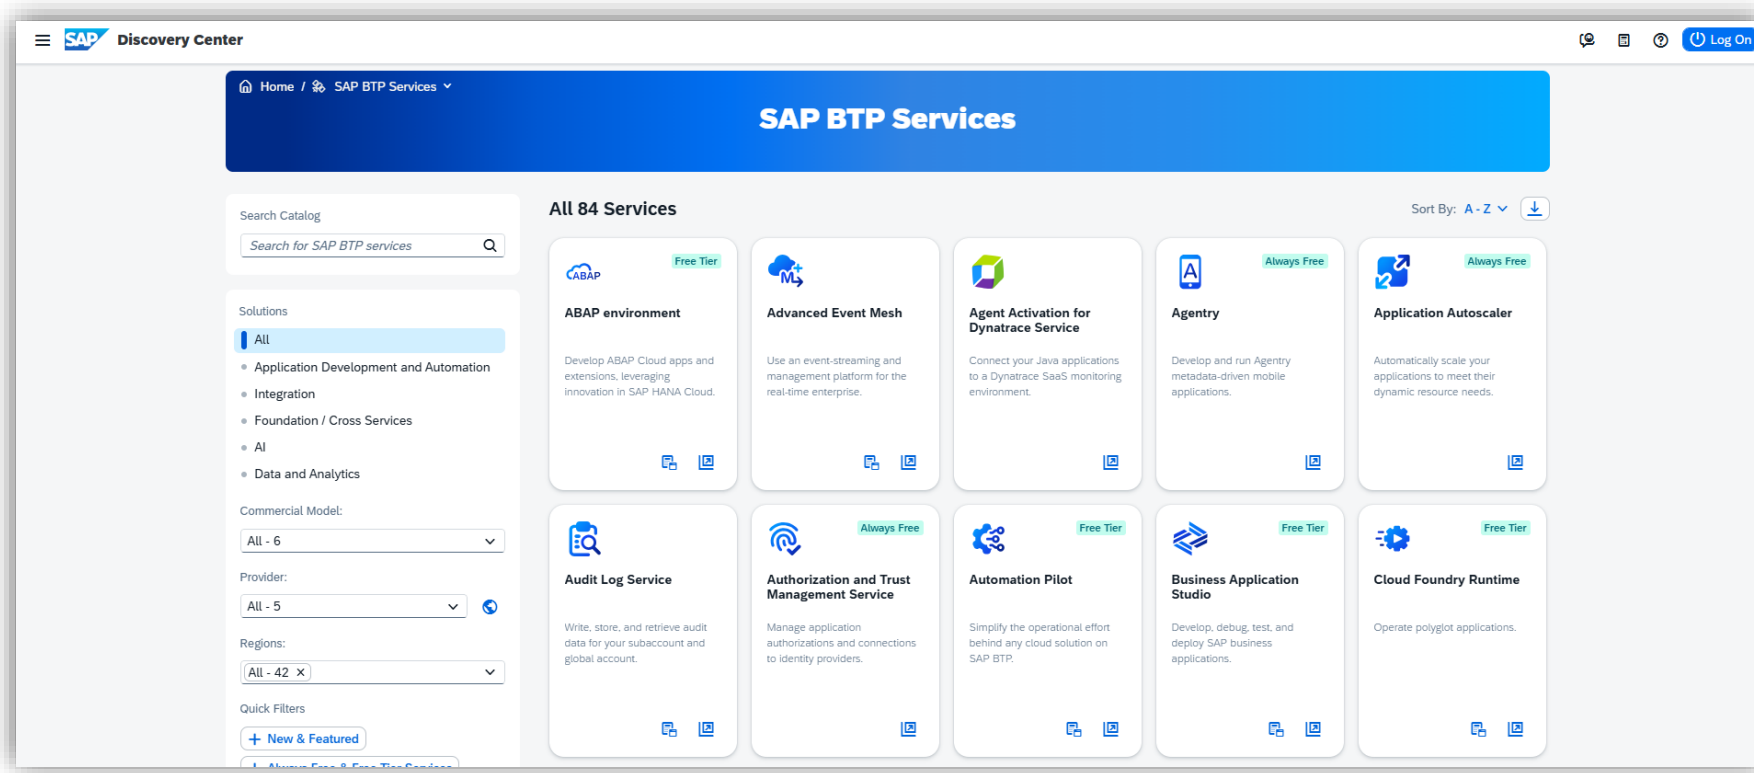

The SAP Discovery Center is a self-service tool that shows services in SAP Business Technology Platform (SAP BTP) and helps to implement specific business use cases. It provides a central entry point with “Missions” & “Guidance Framework” that offer step-by-step guidance, and an overview about various SAP BTP services as well as Business AI services.

URL: [Discovery Center](#) (no user needed)

SAP Discovery Center – BTP service overview

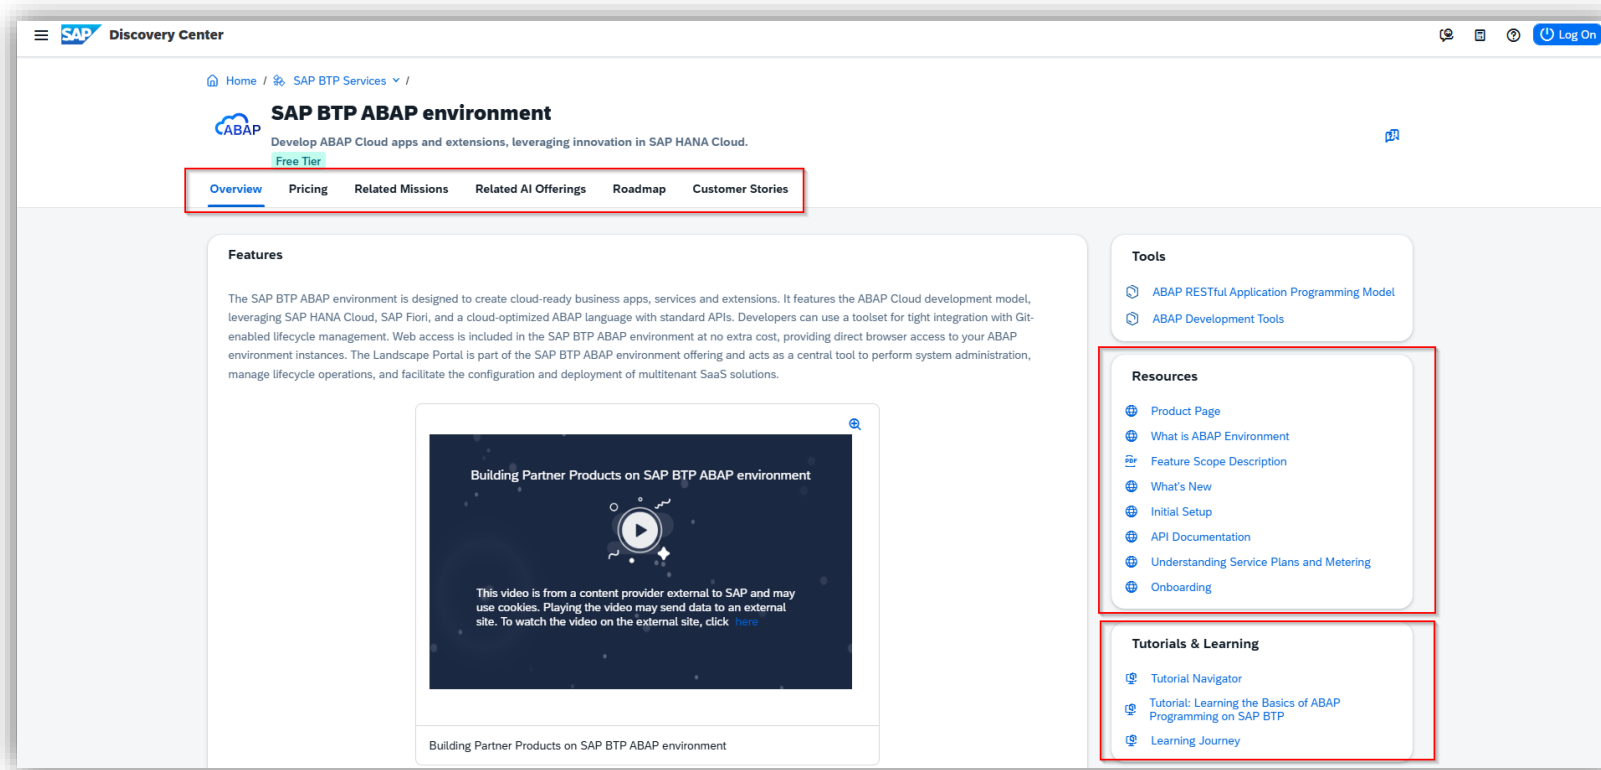

In the BTP service overview you can directly choose between all available services on SAP BTP. Search or filter on the left menu or select a service directly to get more information.

URL: [SAP Discovery Center - Services](#) (no user needed)

SAP Discovery Center – BTP service overview / details

When choosing a service, more details are provided. This overview is the best starting point to get all relevant information. It gives an service **overview** as well as a rough **pricing** overview. Very helpful for project teams & admins is to have a look on the related **Missions** and the **Roadmap** to get insights of future developments.

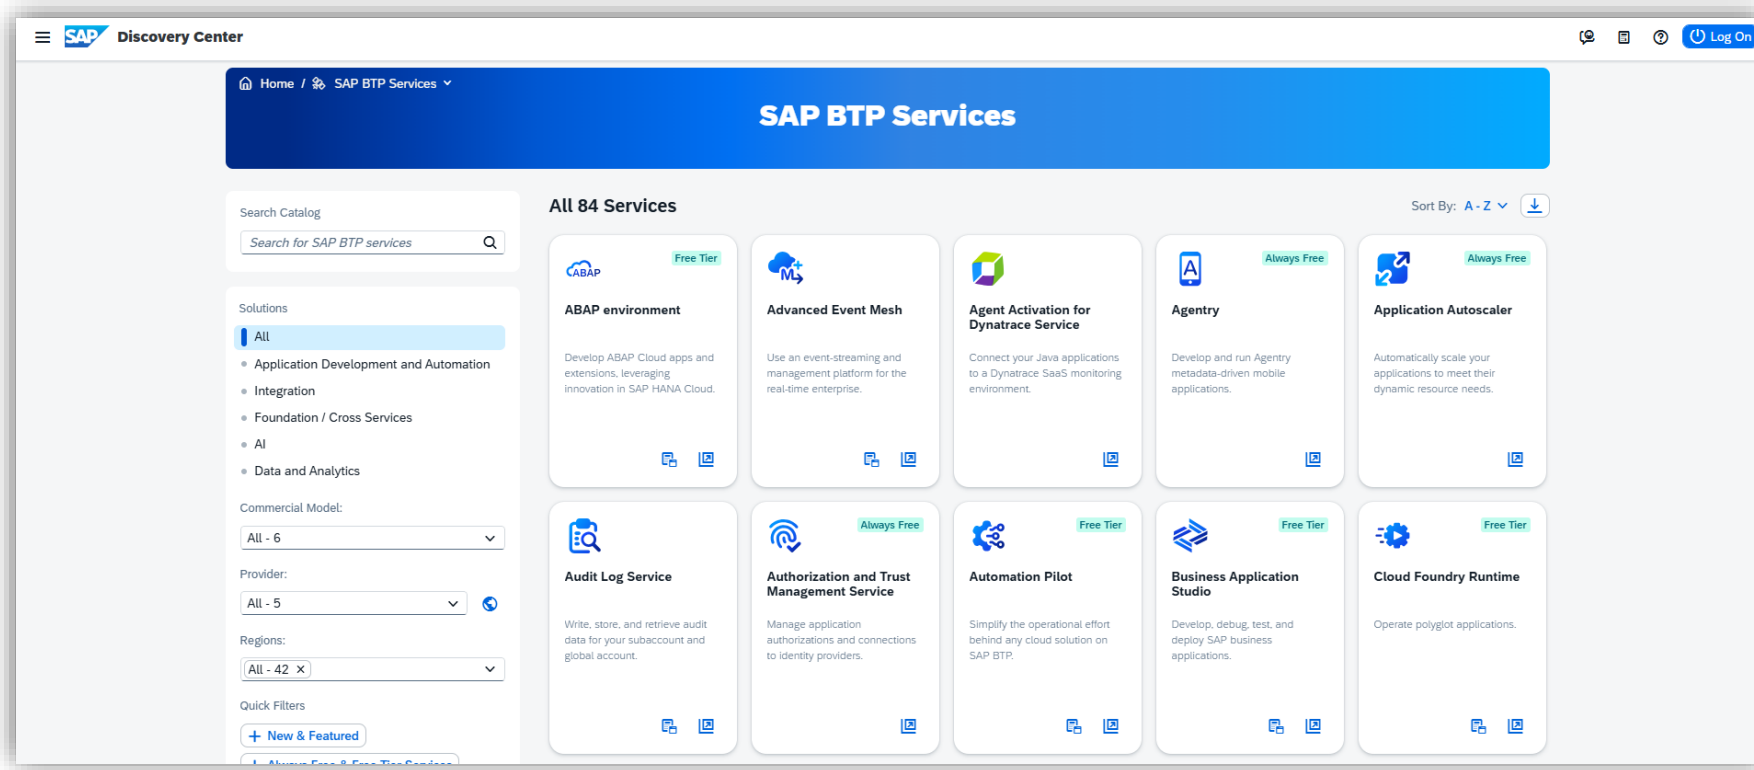

Within **Resources** many helpful links are provided to get a very detailed service information, news and initial setup / onboarding information

Tutorials & Learnings are offered very often, to learn how to use the service and to get business insights.

SAP Discovery Center – SAP Business AI overview

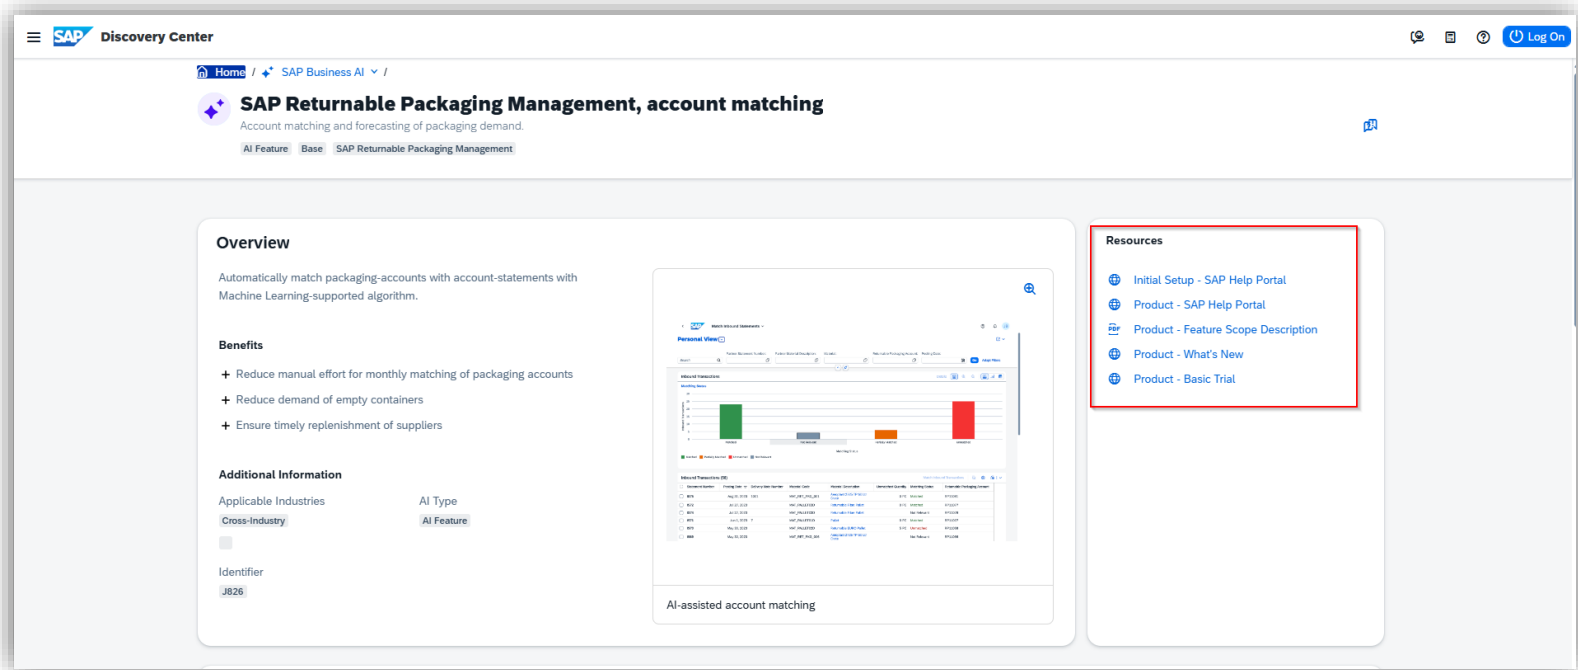

In the SAP Business AI overview you can directly choose between all available AI Agents and Features. Like the BTP service overview, you can search or filter on the left menu or select a service directly to get more information.

SAP Discovery Center – SAP Business AI overview / details

When choosing a service, more details are provided. This overview is the best starting point to get all relevant information. Depending on the AI service, a general information and detailed information about initial setup and product information is offered as well as pricing information.

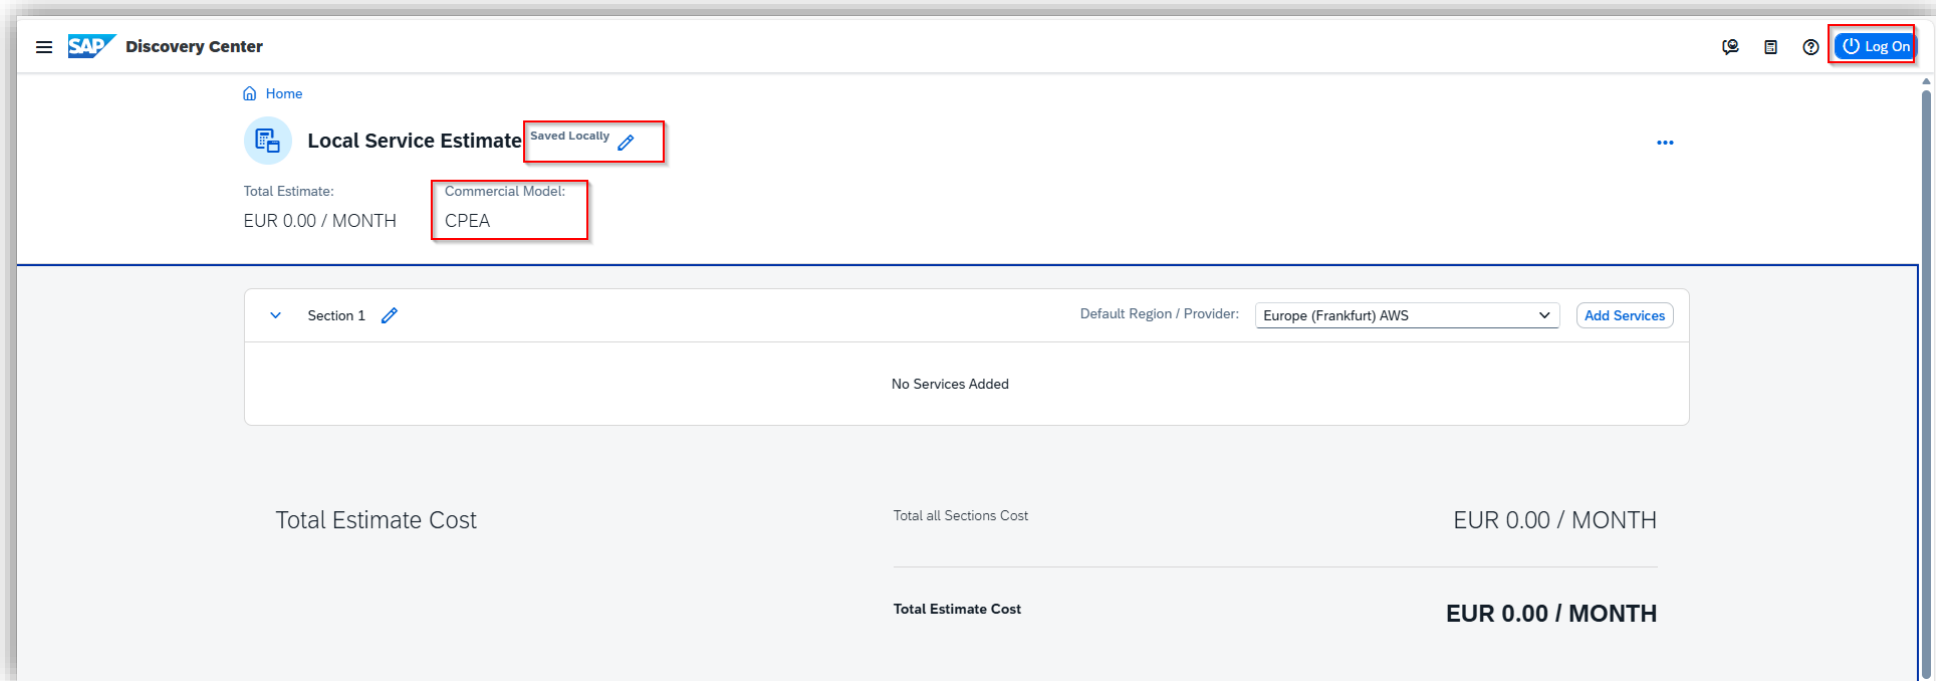

Within **Resources** many helpful links are provided to get a very detailed service information, news and initial setup / onboarding information.

This is not offered for each AI topic yet but will be enhanced within next months by SAP.

SAP Discovery Center – Cost estimator

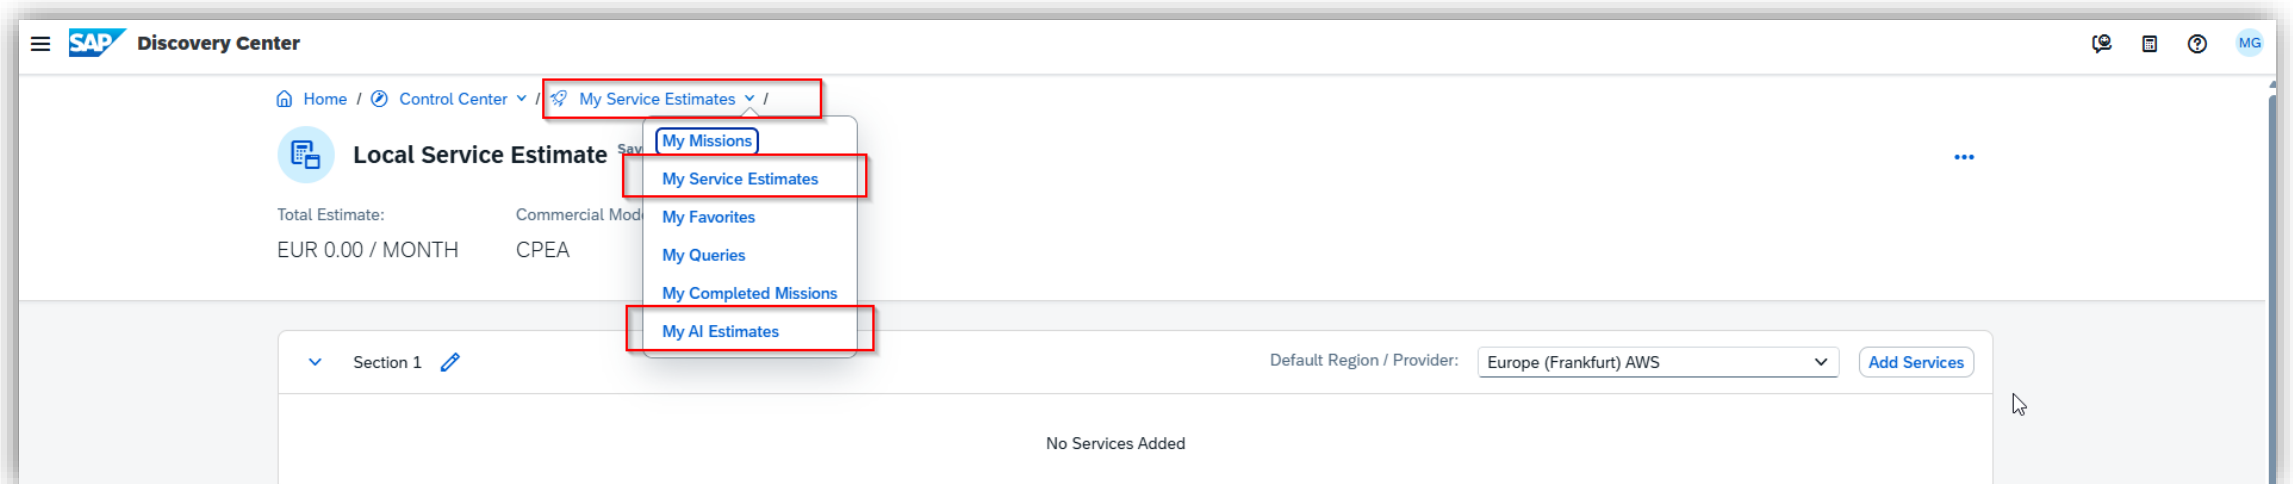

The SAP Discovery Center **cost estimator** is a tool for creating rough estimates of potential costs for SAP Business Technology Platform (BTP) applications. It allows users to add services, choose service plans, and define quantities to see an estimated total cost. The tool is useful for getting a preliminary idea of expenses, comparing different service options, and can also estimate savings for AI features.

SAP Discovery Center – Cost estimator details

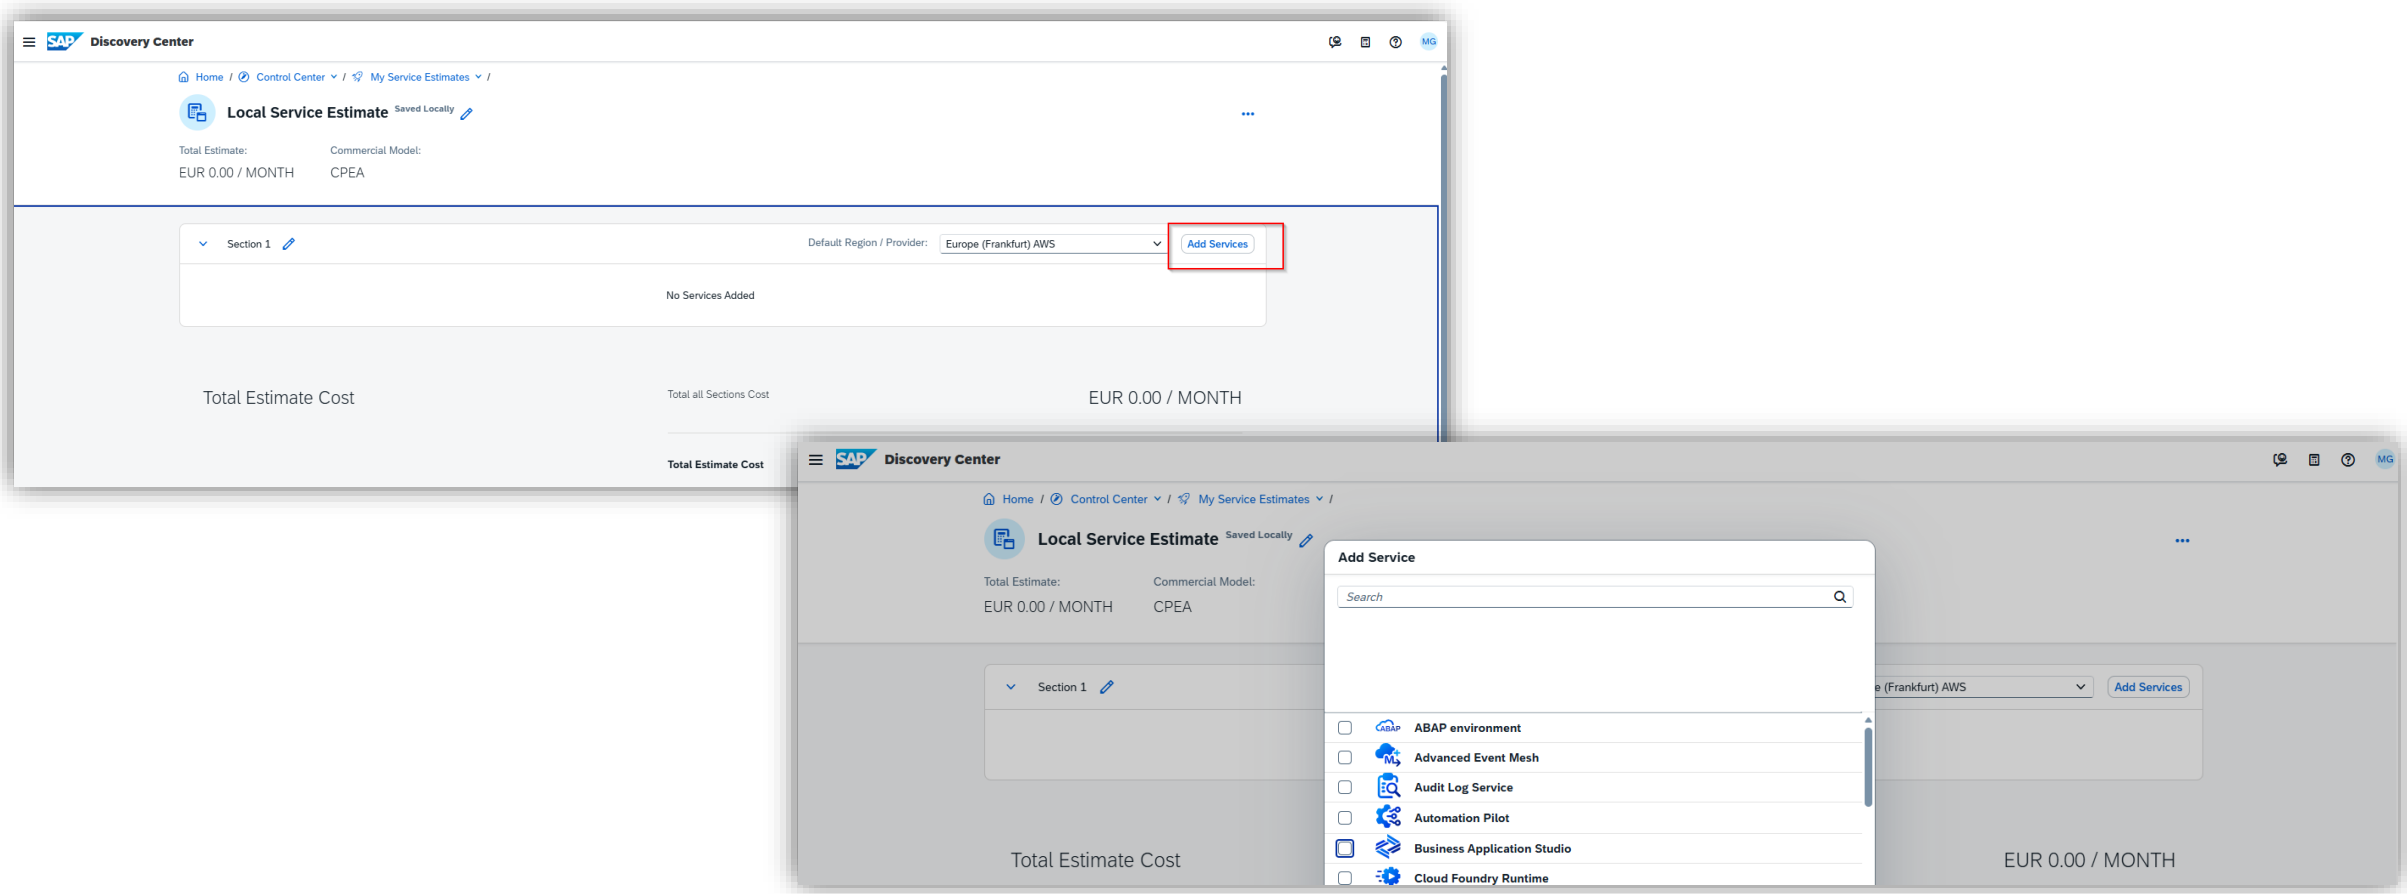

Very helpful is to logon (S-User* needed) to Cost Estimator to allow additional features. This enables fast switch between “My Service Estimates” and “My AI Estimates”. Due to different pricing options, there is no combined option provided by SAP.

*How to get S-User ID see [MySchaeffler](#)

SAP Discovery Center – Cost estimator details

To calculate costs for one or more services, choose “add Service”

SAP Discovery Center – Cost estimator details

After adding one or more services you can fill out some fields to get an overview of monthly costs. Fields like “Service Plan” or others might differ for each service due to different licensing (e.g. user or consumption based).

SAP Discovery Center – Cost estimator details

Some additional hints

- Use default region: Europe (Frankfurt) AWS
- “CPEA” is correct licensing model
- Output shows list prices, for Schaeffler normally it is lower
- When logged on (S-User* needed), download or sharing with other persons (S-User needed) is possible

*How to get S-User ID see [MySchaeffler](#)
